

Project 3 Mockup and Functionality Plan

Circles move towards center of page

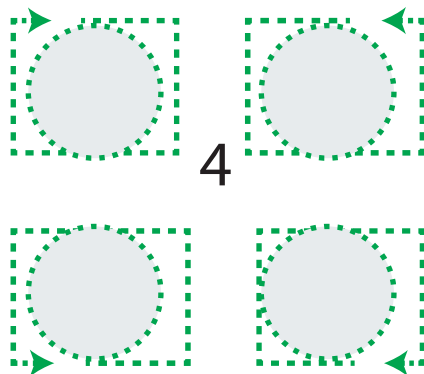

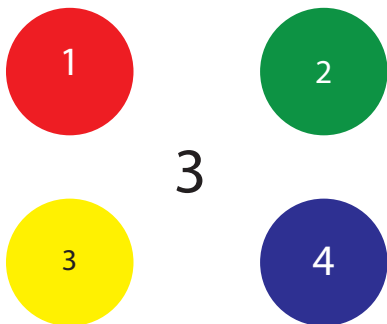

Circles move back into original position.

Steps 1-3 are the animation and will repeat amount of times necessary as dictated by assignment parameters for both the numbers and the words.

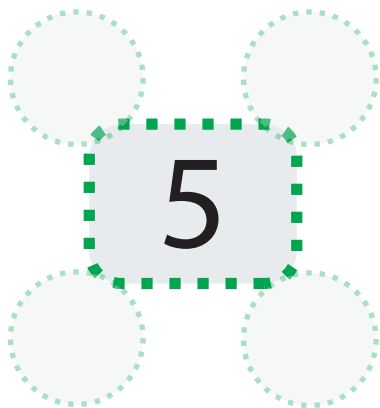

> I will attempt to do this using jQuery effects and perhaps CSS if the situation is appropriate.

> jQuery and/or delay as well.

> Final quote will fade in at center of page

Circles "rotate" around area

Circles fade out, random quote fades in at center.

Steps 4-5 the circles will girate within a small area once number is chosen.

For the final step, they will fade out and quote fade in once final number is clicked.
